Jeffersonville, IN 47130

Dear Rhonda,

I'm writing this letter to let you know how pleased I am with the performance of your product.

I have been using Water Energizers at my facility since 1996 to treat an 800 ton cooling tower, a chilled loop which services two chillers totaling 800 tons and a hot loop that incorporates two 100 horsepower boilers.

During the initial installation of Water Energizers, my skepticism required a coupon rack with mild steel and copper coupons be installed. After 90 days, the coupons were removed and sent to a third-party independent lab for evaluation. The results of this evaluation indicated excellent corrosion control. To date, I have had no corrosion, scaling or microbiological problems.

Recent replacement of a 300 ton chiller gave us the opportunity to do a detailed examination of the water jackets. The results of this examination were impressive.

In light of the aforementioned results, I consider Water Energizers to be an ecologically sound substitute for chemical water treatment and worthy of consideration.

Sincerely,

A handwritten signature in blue ink that reads "Dan Wolf". The signature is fluid and cursive, written over the printed name.

Dan Wolf
